# 一、Login

## 1. Login Method

Use your email and password to log in. Your recommender needs to give you your email and password.

**Tips: You can log in to freecity-APP directly by email. If you forget your password, you can contact the recommender or the official platform.**

## 2. Fill in the form information

Only city partners and community partners need to fill in the relevant information. In order to develop into a more senior partner in the later stage and the platform has other activities to gain priority, it is recommended that partners fill in the relevant information truthfully.

## 二、Development partner

If you want to develop offline partners, you need to add background accounts to the corresponding partners in Account Management

- Tips: 1. Users who have bound partners need to unbind and then add
2. Users who are already partners cannot be added repeatedly (can be modified)
3. You can only add partners who are lower than yourself
4. Partners can only develop to higher identities
5. If the partner is not cooperating, the corresponding account can be deactivated. After the account is deactivated, the current partner will no longer receive the corresponding rebate

## 三、View data

### 1. Statistics

Total Income: The total rebate income you currently receive, please refer to the attachment for specific income scenarios

General Partner: The first-level downline you are currently bound to, including ordinary users

## 2. Customer data

You can see the basic information of the first-level downline users bound by you, including the details of the commission obtained from the current user and the form information submitted by the partner

Unbinding: Unbind the user from yourself. After unbinding, the user is no longer your downline, and you will not receive commissions for the consumption generated by this user.

Please operate with caution unless there are special circumstances.

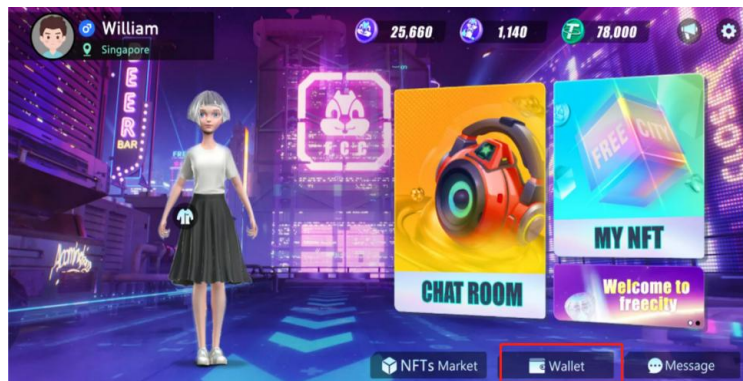

The screenshot displays the 'FreeCity proxy backend' interface. The left sidebar contains navigation links for 'Customer service' and 'Account settings'. The main content area shows the 'Home page / customerlist' with a 'Total revenue' section featuring three cards: FCC (1234567890), FCR (0), and MATIC (1234). Below this is a 'General Partners' section with four cards: Country partners (17), City partners (27), Community partners (43), and Normal account (193). A search bar for 'Account name' and a 'Role' dropdown are present. A table lists three accounts with details on serial number, account name, role, creation time, bind recommender, commission rate, and amount earned. Each row includes links for 'Commission details', 'View form information', and 'Unbind'.
